

WHIPPLETREE PRODUCT INFORMATION & SPECIFICATION SHEET

Hazel Wattle

DESCRIPTION

Lengths of coppice grown hazel supplied in either full rounds or split into half rounds for use in wattle and daub.

Technical Specifications

Sections	25mm to 38mm diameter, round or half round
Length	1.8m to 2.4m
Bundle size	25 Lengths per bundle
Availability	Cut ex the woods – 2-3 weeks

Warnings/Cautions/Recommendations

Hazel becomes brittle once it dries out, therefore, it is important to use it when it's 'green' and supple. For this reason, we do not hold a stock but cut it to order.

There is a lot of variation in hazel wattles, please allow for considerable wastage when ordering.

We have a minimum order value of £400+ VAT due to the cost of the cutting operation.

Commonly Asked Questions

HOW MUCH DO I NEED?

You need to tell us this really. Ask your Plasterer how much gap to leave between the laths or wattles and from this, work out your needs allowing plenty for wastage.

Custom Ordering Advice

If you have measured in square meters, make sure you have worked out your linear metre requirement. Our wattle is sold by the linear metre and is bundled for convenience.
