Warnings/Cautions/Recommendations

If you wish to select waney edged boards, always make an appointment to visit as we have to arrange for the correct packs to be lifted from our stocks to allow you easy access.

We do not select waney edged boards to make a customer's cutting list. Boards are selected as 'random'. Please specify typical lengths and the volume required and we will then select enough 'volume' to cover your requirement.

If a customer requires a lump sum price for waney edged we calculate it based on the volume required plus 100% waste. In this situation it is generally more cost effective to buy sawn to size for the same value and this will save you considerable sorting and cutting time on site.

We cannot guarantee special widths in waney edged, you may need to join narrow boards to create the widths you want. If we find the widths you want in the pack, it's a bonus!

When buying waney edged, if the board looks good, but when re sawn shows a defect, this is part of your wastage.

Any boards wider than 225mm or longer than 3m are subject to surcharges.

Commonly Asked Questions

CAN YOU GIVE US A LUMP SUM COST FOR WANNEY EDGED?

Yes, if you can tell us how much volume you need including wastage. If you can give us a cutting list, we will price it as sawn to size. If you then decide to come and select waney edge boards to give you a lower waste factor, you may well gain!

CUSTOM ORDERING ADVICE

Always order the length you will be using, do not add lengths together and order the longer lengths as longer lengths are more expensive per metre. In other words, you will save money if you order two 1.50 metre lengths rather than one 3.00 metre length which you then cross cut to two 1.50 lengths. Always try to give us the cutting list you actually need to do the job and we will find the most cost effective way to supply it to you.

Tell us what you plan to make and what the various sizes are for i.e. kitchen fronts or table tops etc.
